Our customers averaged

four failed autopays

per month without Card Updater

→

which resulted in

$562 in average lost revenue

per month*

Averages based on aggregated Mindbody customer data from March 2022 to May 2023.

What does it do?

Card Updater maximizes your recurring revenue. When cards are tied to recurring payments, it works behind the scenes to keep them up to date—safely and securely—with no client outreach needed.

- Automatically updates cards—expiration dates, replacement cards, and billing information

- Prevents declined sales from expired or invalid card numbers

- Saves time for both you and your clients by preventing countless emails and phone calls each month

We can't think of a more effective way to **save money and time.**

How does it work?

Verifies that stored cards match what Visa and Mastercard have on file

Scans and updates continuously, before cards decline and payments fail

Provides ongoing, detailed stats in your Card Updater repots

Averages based on aggregated Mindbody customer data from March 2022 to May 2023.
